About Us

Established in the year 2005, in Ankleshwar (Gujarat, India), We, “Lucky Enterprise”, an ISO 9001:20015 Certified company.

We function with a team of highly experienced professionals, who work with the help of their rich knowledge base and strong sense that provides clients the best services. We provide our services as per the varied requirements of clients. We assure our clients that the service is planned and rendered in timely manner as per the provided specification and budget. In order to ensure the best services, we utilize high-tech machines, tools and advanced technologies. Owing to their salient features, our work is widely admired among our clients.

Domain Expertise

We are successfully ranked amongst the top service providers engaged in rendering valuable services. The offered services are rendered as per the precise requirements of clients and are offered within their budgetary constraints. The services provided by us are executed in accordance with the international quality standards. Our team of experts assists us to satisfy clients by providing the best quality services in this fast changing and competitive business environment. With the use of advance technology and machines, we render these services as per the specific requirements of our valuable clients.

Our Team

We have hired a team of qualified & experienced professionals to provide a comprehensive range of products to cater to the needs of the clients. These professionals are picked by following ascetic tests & interviews to testify their candidature claims. The experts possess vast domain expertise & knowledge and are well-versed with the proficient methods of manufacturing class-apart products. The team executes the assigned tasks in association with the quality expert; ensuring carat quality of the products.

The team includes:

- Efficient engineers
- Quality controllers
- Technicians
- Sales and marketing experts
- Skilled and semi skilled workforce

Client Satisfaction

We are a client centric organization and believe in ensuring optimum satisfaction of our esteemed clients. Our products are manufactured using advanced methodologies & modern technologies so as to ensure that these cater to the diverse requirements and meet the high expectations of customers. Besides, we conduct severe evaluation & inspection of the various processes in order to avoid and overcome the recurring corrosion problems. In addition to the products offered by us, our experts are engaged in providing post delivery pickling and passivation treatment specifically for the SS process systems. Thus, we have been able to garner a huge clientele across the Indian Subcontinent.

Why Us?

With in-depth industrial experience, we are trusted name engaged in presenting service to our clients.

Other factors that have led to our prosperity are as follows:

- Rich industry experience
- Proficient personnel
- Professionalism and timeliness
- Use of world class machinery and tools

Established in the year 2005, in Ankleshwar (Gujarat, India), we, "LUCKY ENTERPRISE", an ISO 9001:20015 Certified company, are the renowned organization occupied in rendering well organized and reliable.

We function with a team of highly experienced professionals, who work with the help of their rich knowledge base and strong sense that provides clients the best services. We provide our services as per the varied requirements of clients.

We assure our clients that the service is planned and rendered in timely manner as per the provided specification and budget. In order to ensure the best services, we utilize

high-tech machines, tools and advanced technologies.

Apart from this, the offered services are highly demanded in the market for their features like flexibility, timely execution, effectiveness and reliability.

Owing to their salient features, our work is widely admired among our clients.

Features:

- Unmatched quality
- Reasonable
- Timely executed
- Corrosion resistant
- Durable
- Rugged

The chemicals used in this service are of excellent quality and are processed employing cutting-edge techniques in complete compliance with set industry standards.

In addition to this, this service is based on latest technology and is highly admired in the market for its timely execution & reliability.

Supported ourselves with sound amenities, we are active in bringing forward a comprehensive collection of Buffing Parts.

Owing to their highly durable nature, fine finish and reliability, this offered product range is highly demanded. More to this, these are delivered by us in safe packaging in between the assured span of time.

Pickling

Application is with pickling brushes of acid-resistant materials for repeated use.

- Reaction Times
- Rusty and acid-resistant steels, stainless steels 15 - 60 minutes
- Nickel and nickel alloys 5 - 20 minutes
- Titanium & Alloys by trial only

Since the inception of our organization, we are providing Stainless Steel Pickling to the clients. Stainless steel is

grinded to fine particles and is made free from all types of impurities.

After this, Stainless Steel Pickling is tested on the predefined parameters of the industry by the quality controllers to examine whether or not Stainless Steel Pickling is 100% pure or not.

This Stainless Steel Pickling finds application in the removal of heavy scales, rust particles and other such impurities.

Our professionals render Pickling passivation these services after completely understanding the needs of the clients. Moreover, we are offering these Pickling passivation services at reasonable prices to our valued clients.

Pickling Passivation

The Pickling Passivation Chemicals comes to complete utility for forming a protective layer that prevents the base metal from facing corrosion. Besides, the Pickling Passivation Chemicals comes to use for neutralizing the acidic pH of the metal after pickling.

Pickling Passivation Chemicals

We Works a clear thyrotrophic paste used to remove weld burn and annealing colors from Stainless Steels after welding. It can also be used on Titanium, Nickel and their alloys. This product settles on the shelf and must be mixed well before use to ensure that the liquid and paste combine.

Pickling & Passivation

The Pickling and Passivation Chemicals are used for preventing corrosion to components made of stainless steel and as a result considerably influences in improving their life and productivity.

Pickling helps in removing a thin surface layer from the stainless by using an acid solution, which is usually a hydrofluoric and nitric acid mixture. In addition, pickling will remove embedded iron, heat tin and weld scale. Whereas passivation is involving nitric acid in the solution, which can take place both in successions and simultaneously. Nitric acid

has the required strength to remove free iron from the stainless steel surfaces on its own, majorly used in steel industry.

The products which we cater under this category are Pickling Paste, Passivation Gel, Stainless Steel Welding Spot Removing Paste, Acid Neutralizing and Passivating Chemical and Water or Brine System Cleaning & Passivating Agent. These Pickling passivation services are provided by our highly experienced professionals using best quality polish as per the defined industry standards.

PRODUCT: Pickling Liquid

PACK APPLICATION

- : 5 Kgs
- : Clear liquid for removing built in corrosion, Oxide scale, Discoloration & feritic contamination from stainless steel surface.

METHOD

- : Apply with acid resistance brush or Immerse in acid proof tank allow time to take effect and wash off with water. For inside pipe cleaning circulate the L-2 liquid in the pipe through P.P. Pump & wash out with clean water.

PRODUCT : PASSIVATION

PACK APPLICATION METHOD

- : 5 Kgs.
- : Clear liquid which is used for protection, layer on stainless steel.
- : Spray on S.S. surface & leave for 1 to 2 hrs and wash off with water Solution temperature 40° c

PRODUCT : Jelly Weld CLEANER

PACK APPLICATION

- : 1 Kgs.
- : Pickling Paste for removal of Weld scale & heat discoloring from stainless steel surface.

METHOD

- : Apply with acid resistance Brush, allow time to take Effect, scrub and wash off with water. Working temperature 5 to 40° c

MANUFACTURER & Supplier PHARMACEUTICAL EquipMENTS

PHARMACEUTICAL DUSTBIN

We also offer superior quality of dustbins which are highly durable and strong enough to resist all damages.

We offer dustbin on industry leading prices.

RECEIVER

Receiver tank are used for storage of Chemicals, solvents and any type of liquids in small quantity for chemical, pharmaceutical, biotechnology and food processing industries.

We manufacture air receiver that serve the dual purpose of compressed air storing and delivering it when the compressor is not running. Other function of air receiver is to serve as a pulsation damper and moisture trap.

PHARMACEUTICAL Liquid STORAGE Tank

We put forth a range of Liquid Storage Tank, which is manufactured by using top grade stainless steel. Our professionals design these drums in compliance with the industry standards and test them for ensuring zero leakage.

These are used for storage, shipping and handling of foods and chemicals, as the products remain pure and away from environmental hazards. Clients appreciate these tank for properties such as corrosion resistance, tensile strength and re-usability.

PHARMACEUTICAL Stepwise ladder

We offer superior quality of stepwise for patients made from superior quality.

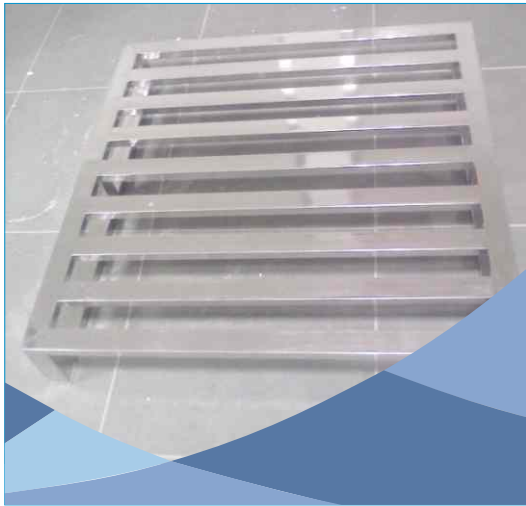

We manufacturing superior quality of stepwise ladder as per client's requirement.

Which are highly durable and strong enough to resist all damages.

We offer stepwise on industry leading prices.

MANUFACTURER & Supplier PHARMACEUTICAL EquipMENTS

PHARMACEUTICAL Pallet

We offer packaging pallet which are easy to handle and are used in packaging of small spares.

These are available in varied sizes and are offered at industry leading prices. Our pallet have universal design and also minimize breakage of fragile articles.

These pallet are also designed in according to our clients individual requirements.

PHARMACEUTICAL Trolley

Pharmaceutical Trolley made from high quality 316 stainless steel, especially suitable for hygienic applications

- Heavy duty construction
- 316 stainless steel
- Crevice free
- Satin finish
- Radiuses corners for easy cleaning
- Huge range of sizes

SERVICE

All Type of Pipe Line Structure & Fabrication Work

We strive to fulfill the diversified requirements of the customers by rendering unparalleled Fabrication Service. For this, we have employed a deft team of expert professionals who monitor the entire execution process. Further, these professionals assure that the services are rendered in accordance with the global quality norms & standards.

TRADING

All type of Buffing Wheels

Aided by our latest market research, we are engaged in offering an exclusive range of Buffing Wheel. This buffing wheel is designed using quality assured material by our experienced workforce in tandem with the market norms. Our provided buffing wheel is checked by quality controllers so as to deliver a defect free range. As well, the offered buffing wheel widely finds its applications in various industrial sectors and available in different sizes.
